

THE ARCTIC ADVANTAGE

QUALITY | Standard Features

One piece corners

- » Increased durability and strength

LED digital thermometer

- » Easily readable display

36" high kick plates on the interior and exterior of doors

- » DTP or Smooth Stainless Steel
- » Enhanced door protection

Hard rail foamed-in-place urethane panels and heavy duty hinges

- » Permits greater design flexibility, protects and provides longevity

34" Self-closing, foamed-in-place, in-fitting, flush-mounted door with easily replaceable magnetic gaskets and dual door sweep

- » Improves door performance

Modular design with cam-lock tongue and groove construction and NSF approved vinyl gaskets

- » Ensures a proper seal

Inside safety release and safety night light

- » Guarantees safe exit

NSF approved smooth aluminum floors and center mounted vapor proof light

- » Optional finishes available and maximized storage space

Insulating rating of 5-3/8" thick cooler panels R-value 38.5 and freezer panels R-value 44

- » Regulation Compliant

Freezer door heaters include a temperature sensing device

- » Turns heater wire off when not needed

Cooler doors include structural FRP, freezer doors include structural aluminum

- » Reinforces frames for improved door durability

Insulating rating of 4" thick cooler panels R-value 28 and freezer panels R-value 32

- » Regulation Compliant

SERVICE

ACSEP | Arctic's Customer Service Excellence Program

Redefining customer care before, during & after the sale

BEFORE

Consulting, engineering + design:

Providing the correct refrigeration solution to suit the required application

Detailed drawing

Experienced Staff: The Arctic team is highly trained to understand and satisfy the customer needs

DURING

All walk-ins are pre-assembled, inspected and photographed to ensure proper fit.

Supportive and knowledgeable sales team:

A project coordinator assigned to each project from quotation to shipment.

AFTER

15 year panel
5 Year compressor
1 Year parts
1 Year labor

FOLLOW UP

Arctic's customer care program includes a customer satisfaction survey

ENVIRONMENTAL COMMITMENT

EISA: All Arctic products are compliant with the Energy Independence & Security Act of 2007

EC Motors: Increased refrigeration unit efficiency

Lights: All light fixtures are EISA compliant

Motion sensor available: Extends the life of light fixtures and improves energy savings

Temperature sensor: Maintaining optimal temperature within walk-in coolers & freezers

Energy Independence & Security Act

ADDITIONAL FEATURES

Patterns, colors, and vinyl coated metals:
+100 finishes available

Glass doors, reach-in, and swing doors
A wide variety of door options are available

Reinforced wall, ceilings, and floors
Adding strength to the construction

Ceiling heights
Adapting the walk-in cooler to the building height

Angled walls
Maximizing the space available

Door accessories
Adding visual appeal and protection to the door

High ambient & outdoor units available
Adjusting the systems to different temperature requirements
